

# CW1B2: An intelligent parking garage

**Departement:** Departement Computerwetenschappen  
**Co-titularis:** prof. dr. ir. Bart De Decker  
**Begeleider(s):** Shuaibu Musa Adam, Shirin Kalantari, Hamdi Trimech  
**Teamleden:** Ruben Marien, Robin Martens, Neel Van den Brande, Rik Vanhees, Rune Verachttert, Tuur Vernieuwe

**KU LEUVEN**

 **FACULTY OF  
ENGINEERING SCIENCE**

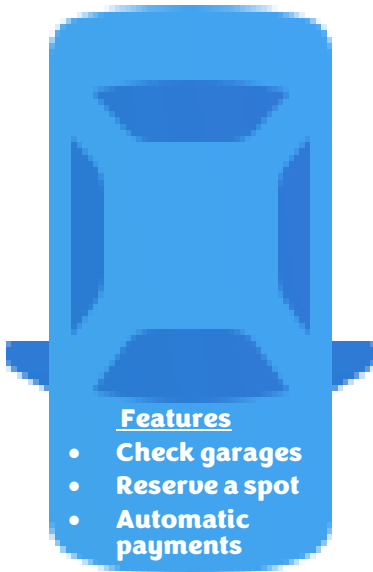

## Do you value your time?

Have you ever been stuck waiting behind a driver who forgot to pay their parking ticket before trying to exit the parking garage or driven to a parking garage only to find that it's already full? At Parking Boys we value your time, so we created a solution to make your parking experience easier.

## What do we offer

We made an app that lets you check the available parking spaces even before you have to leave your house and reserve one in advance. You will never have to wait before a barrier ever again because thanks to our automatic numberplate recognition your car will be registered when entering and exiting and the payment will automatically be charged to your account, so you don't have to worry about forgetting to pay your ticket at parking meter.

## Demonstration day

We invite everyone who wants to see our system in action to come to the demonstration day. We will show our scale model of a parking garage in combination with all the features of our system.

## When and where
